(54) Title: ADJUSTABLE FURNITURE SUPPORT APPARATUS

(57) Abstract: Adjustable furniture support apparatus (10) comprises a support leg (12) and retaining means in the form of retaining member (14) which is arranged to retain a support member (16) to the support leg (12). The support member (16) is arranged to extend radially away from the longitudinal axis of the support leg (12) and the support leg (12) is arranged, in use to be in a substantially vertical plane whilst the support member (16) is arranged to be in a substantially horizontal plane. The support member (16) has a retaining flange (26) defined at a longitudinal end thereof which is arranged, in use, to locate within a retaining groove (24) of a collar provided on the support member in order for the support member to be retained at selected angle about the longitudinal axis of the support leg (12).
